

7

8

9

10

9	7	5	3	1
10	8	6	4	2

The diagram consists of a 4x5 grid. The second row contains the numbers 9, 7, 5, 3, and 1 from left to right. The third row contains the numbers 10, 8, 6, 4, and 2 from left to right. A smooth, curved line starts at the left edge of the grid, passes through the number 9 in the second row, then curves downwards and to the right, passing through the number 10 in the third row, and continues to curve upwards and to the right, passing through the number 1 in the second row of the fifth column.
